

• PROFILE SUMMARY

Flutter Developer with 2.7 years of experience building cross-platform mobile and desktop applications — from consumer apps to fintech platforms. Currently at Beyondco Technologies, delivering production-grade Flutter features including Smallcase MF SDK, Finvu Account Aggregator, and loan-fetch flows using Clean Architecture and MVVM. Leverage AI-assisted development (Cursor + Claude) to ship faster without compromising code quality — consistently meeting delivery timelines. Strong command of BLoC/Cubit, Riverpod, scalable architecture patterns, and offline-first design.

• SKILLS

- Languages & Frameworks: Dart, Flutter, Node.js
- Architecture & Patterns: Clean Architecture, MVVM, BLoC/Cubit, Riverpod, Provider, Design Patterns (Repository, Factory, Singleton)
- State Management: BLoC/Cubit, Riverpod, Provider, GetX
- Backend & Database: Firebase (Auth, Firestore, FCM), MongoDB, SQLite, REST APIs
- SDKs & Integrations: Smallcase MF SDK, Finvu Account Aggregator SDK, Razorpay, Google Sheets API, TestFlight, Firebase App Distribution
- DevOps & Tools: Git, GitHub, CI/CD Pipelines, Postman, Figma, VS Code, Android Studio
- AI-Assisted Development: Cursor, Claude — consistent on-time delivery with high code quality

• PROFESSIONAL EXPERIENCE

Flutter Developer — Beyondco Technologies Pvt. Ltd. (SafeBox) Mar 2024 – Present · Product-Based Startup · Fintech

Jan 2026 – Present

- Owned multiple modules end-to-end — from requirement to deployment — across Android and iOS.
- Integrated Smallcase MF Stocks SDK, Finvu Account Aggregator SDK, and Loan Fetch flows using MVVM + Clean Architecture.
- Built complex custom animations using CustomPainter, AnimationController/Tween, and Lottie — enhancing UX across key fintech flows.
- Delivered fast MVPs with rapid regression cycles, leveraging Cursor AI for 10x development speed.
- Wrote widget tests, unit tests, integration tests, Cubit tests, and request/response model tests — full test coverage across modules.
- Implemented FCM push notifications, Firebase App Distribution, and TestFlight for iOS QA pipelines.
- Maintained offline-first architecture (SQLite + Firebase sync) for reliable data access.
- Received consistent positive feedback on app quality; led multiple regression rounds in production.

Flutter Developer — T-NXT India Pvt. Ltd. Dec 2023 – Feb 2024 · Service-Based

Dec 2023 – Dec 2025

- Sole Flutter developer — handled the entire product lifecycle from business requirement analysis, UI/UX design (Figma), development, testing, to deployment.
- Built a cross-platform Windows + Mobile billing app for gaming cafés using Flutter + Node.js + MongoDB.
- Implemented GST billing engine, PDF/Excel report generation, real-time session timers, and Google Sheets integration.
- Designed multi-role access system (Admin / Manager / Staff) with JWT authentication.
- Optimized backend queries with lazy loading; hosted backend on Hostinger.

• EDUCATION

- **Dhaanish Ahmed Institute of Technology**
 - Bachelor of Computer Science and Engineering
 - August 2020 – June 2024 | CGPA: 8.19/10
